CREATIVE REUSE FOR A SUSTAINABLE FIT

Refit Wool & Cotton è una linea di notebook che affascina grazie a un'anima e un look profondamente eco-compatibile. Una miscela di 40% di fibre riciclate post-consumo e 15% di scarti tessili di lana o cotone si uniscono alla cellulosa proveniente da foreste gestite in modo sostenibile.

Refit Wool & Cotton is a line of notebooks that captivates, thanks to an eco-friendly soul and look.

A blend of 40% post-consumer recycled fibres and 15% of wool or cotton textile waste is mixed with cellulose from sustainably managed forests.

4 / Refit wool & cotton

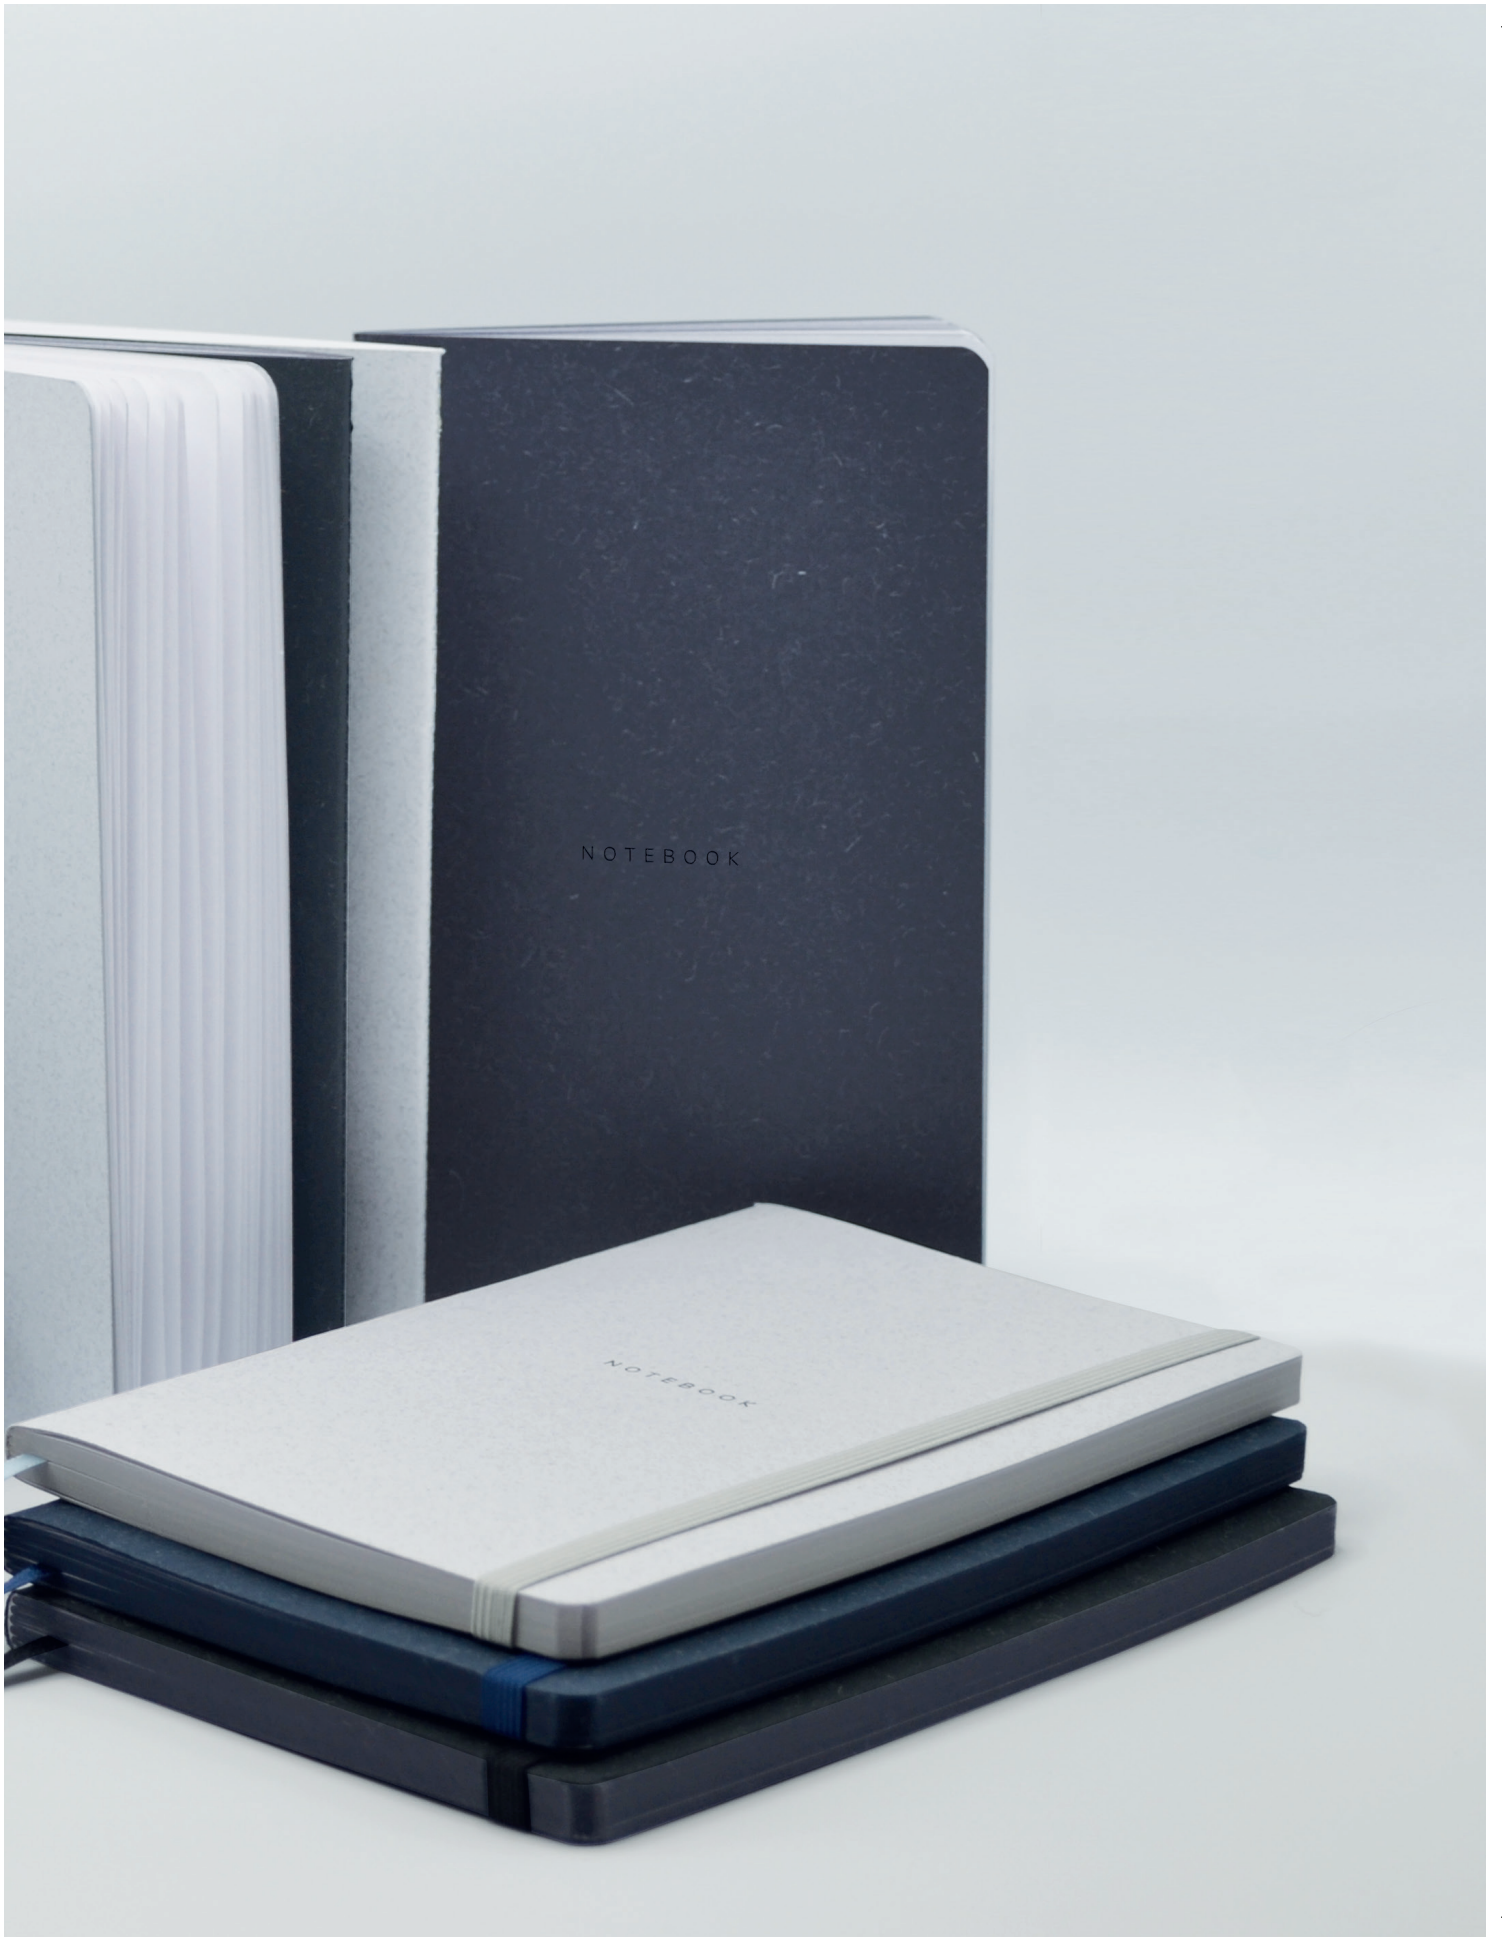

Protagoniste dei notebook Refit sono le morbide fibre tessili rigenerate, visibili nella trama e soffici al tatto. Gli ingredienti ideali per una collezione gentile, creativa e sostenibile.

The leading features of Refit notebooks are the soft regenerated textile fibres, visible in the texture and soft to the touch. The perfect ingredients for a gentle, creative and sustainable collection.

be inspired by a soft touch

NATURAL AND COZY NORDIC VIBES

Il comfort di Refit si declina in modelli con fibre di lana dalle tinte scure, ricche di calore e tradizione, mentre la versione in cotone sfoggia un elegante grigio chiaro, leggero ed avvolgente. Lo stile nordico si traduce in un design curato nei dettagli tono su tono come taglio colore all'acqua delle pagine, elastico o cucitura.

The comfort of Refit is available in dark colours wool fibers, rich in warmth and tradition, while the cotton version sports an elegant pale gray, light and enchanting. The Nordic style translates into a refined design in tone-on-tone details such as water-based coloured edges, vertical elastic band or stitching.

COVERS PAPER CERTIFICATIONS REFIT WOOL & COTTON

La copertina di questi taccuini è realizzata in Refit Wool, materiale realizzato con residui della produzione tessile di lana e cotone, i quali, grazie al processo di lavorazione, diventano materia prima alternativa per la produzione della carta.

The cover of these notebooks is made of Refit Wool, a material made with residues from the textile production of wool and cotton, which, through a manufacturing process, become alternative raw materials for the production of paper.
